

Gods Provision Online Academy Program Information

- **Planning** – Through student-centered learning, our teachers will help guide your child by focusing on their strengths and love of learning and promote their development of knowledge and skills.
- **Progress Tracking** – We assess your child’s ability to comprehend and keep up with their assignments and courses, their acquisition of skills and knowledge, and what the appropriate next steps for learning should be. These assessments provide teachers, students, and parents with specific information about a child’s experience and progress.
- **Flexible Schedule** – We use an asynchronous learning model that gives students greater flexibility to help them succeed in academics. It’s designed for a student to grow personally and academically with a flexible schedule to ensure the education works with their own terms and schedule.
- **Homework** – Students are given a suggested schedule that acts as a guide for when assignments and coursework need to be submitted. There’s a weekly outline of coursework covering each subject area. Weekly plans work in tandem with supporting books, experiments, exploration, and other learning methods, with an emphasis on a hands-on approach.
- **K-5 World Language Courses** – As early as Kindergarten, students in grades K-2 have the opportunity to study Japanese, Spanish, French, or ASL in online courses designed for younger students. There’s a focus on vocabulary acquisition through games, songs, stories, and practice activities. Starting in third grade, students can also add German or Chinese. As students get older, they enhance their skills with greetings, introductions, grammar, commands, and songs, phrases, and activities.
- **Bible Study** -- We take the development of your child's spiritual growth just as serious as their educational development. With GPA we will make sure that your child is still rooted in the love of Christ.
